## Tourist Attraction Spots in Penang

Penang, Malaysia boasts a vast number of significant and fascinating historical heritages. Tours to these places can be arranged with independent tour operators via the conference secretariat.

### "Batik Making"

Originally an Indonesia craft, batik is today an integral part of the Malaysian makeup. Batik making, an ancient craft developed over at least two thousand years, is a method of producing coloured prints on textiles by waxing. The designs and patterns are drawn by hand or stenciled, and often reflect native floral, birds and butterflies. The motifs and colours on batik are produced on clothing such as shirts and sarongs, cushion covers, tablecloth, placemats and handkerchiefs, to name just a few. In this place, you will be able to observe the actual process of "batik-making".

### Kek Lok Si Temple

The Kek Lok Si (Temple of the Supreme Bliss) stands with dignity atop a hill overlooking the Air Hitam Valley. Its is perhaps the finest and biggest Buddhist temple in Southeast Asia. Built between 1893 and 1905, the attention-grabbing Pagoda of Ten Thousand Buddhas was skillfully built in tiers, influenced by Thai, Burmese and Chinese architectural styles.

### Penang Hill

Rising above 830 metres above sea level, Penang Hill is a popular rendezvous for locals and tourists. Penang Hill was first established as a cool hill retreat during the colonial period. It is accessible via a funicular train ride, with views of flora and fauna, farmers houses and old colonial buildings. The summit offers refreshing cool air and an impressive panoramic view of Georgetown.

### Wat Chayamangkalaram Temple

A Buddhist temple of Thai architecture that houses a 33-metre long gold plated reclining Buddha, Wat Chayamangkalaram, is the world's third largest reclining Buddha. A pair of serpents adorns the entrance, which leads to the inside of the temple where statues of Buddhists deities with gold leaf finishing can be viewed.

### Fort Cornwallis

Fort Cornwallis is a historical site where Captain Francis Light first landed in 1786. A moat and a fort of Nibong stockade once surround it until 1804, when convict labour reconstructed it with bricks. Today you will find a crafts shop, an open-air auditorium and a bunker within the fort. Historical photographs and documents are well kept and displayed here.

## Final Announcement and Call for Papers

## International Conference on Environment 2008 (ICENV 2008)

Environmental Management & Technologies Towards Sustainable Development

15th - 17th December 2008  
G Hotel  
Penang, Malaysia

## INTRODUCTION

In today's world 'Environment' and 'Sustainable Development' are the buzz words. It is high time that mankind has to aware of 'Environmental Management & Technologies Towards Sustainable Development'. These key issues form the primary focus of this

conference, which provides the stage for active discussions regarding these real time issues. Examining the current practices and determining the policies of the future endeavours occupy a prominent place in this conference. Retrospection of the deliverables and their impacts of the previous conference (ICENV 2006) which was on similar themes, also forms parts of this conference. The expectations from this conference are very high because of the appropriateness and relevance of the topics in day to day life.

## THEME

Environmental Management & Technologies  
Towards Sustainable Development

## WHO SHOULD ATTEND

Environmental policy makers, senior government officials and administrators, scientists, engineers, academics, graduate students, environmental consultants, managers and contractors, environmental safety and health officers, green politicians, environmental NGOs, businessman and individuals.

## SYMPOSIUM VENUE

The International Conference on Environment 2008 will be held at G Hotel, Penang. A bold, beautiful creation in homage to modern, contemporary design, G Hotel fuses cool modernity with stylish comfort.

Its convenient location overlooking Penang's most famous boulevard – Gurney Drive – means that guests enjoy the advantages of being close to the sea and all the shopping and dining attractions along the promenade, such as the destination mall Gurney Plaza and Gurney Drive's legendary hawkers food enclave. The beauty of G Hotel's location is that it is also only a short drive away from the central business and banking districts. Penang or better known as the Pearl of the Orient boast many historical sites, white sandy beaches and fascinating tourists spots. It is truly Malaysia's melting pot. Visitors will come to realize just how wonderfully multi-racial this state is after visiting the various heritage buildings and cities representing the island's many ethnic groups with diverse races and cultures. Penang is very famous for its hawkers fare that are tasty and cheap. Foods that you shouldn't miss in Penang are 'Sate', 'Nasi Kandar', 'Laksa', and 'Char Koay Teow'. Penang can be conveniently reached by airplane and express bus from Kuala Lumpur, the capital city of Malaysia.

## SCOPES OF THE CONFERENCE

The environmental issues identified to fall within the broad scopes of the conference may cover but are not limited to:

- Sustainable Management of Environment; Wastewater, Solids and Hazardous Waste
- Water Supply
- Air Pollution Mitigation, Monitor, Control Technologies
- Life Cycle Assessment, Risk Assessment, Health and Safety Impact Assessment
- Cleaner Technologies; Control, Treatment & Remediation Techniques
- e-Waste Management
- Carbon Credits
- Sustainable & Green Energy
- Other Related Environmental Issues

## KEY DATES

Abstract submission deadline: June 30, 2008

Notification of acceptance: July 15, 2008

Deadline for early registration: August 31, 2008

Full manuscript submission deadline: September 30, 2008

## CONFERENCE LANGUAGE

English will be the official language of the conference.

## SUBMISSION OF ABSTRACTS

Intending authors are invited to submit abstract (in MS Word format) on topics within the scope of the conference in not more than 1 page of A4 size paper. The abstract should state clearly the purpose of the work, approach and significant results. A maximum of 5 key words should be included in the abstract. Abstract must be prepared on single side, single column (margins should be set to 3 cm (left), 1.75cm (right), 2.5cm (top and bottom), single space typewritten form and must include author's address, affiliation, telephone, email and fax numbers. Use 16-point for the title, 10-point for the affiliation and 12-point for the rest of the text. Except special symbols and units, Times New Roman font is preferred. The abstract will be reviewed by the conference's technical committee. The authors will be then required to submit a full paper once the abstract is accepted. The final acceptance

will be based on the content of the full paper. All papers accepted for oral and poster presentation will be incorporated in the conference proceedings and the abstracts in the Book of Abstracts, which will be available at the time of the conference. The abstract should be submitted online through the conference website. Upon receipt of your submission, you will received an acknowledgement.

## REGISTRATION FEES

	Rate	
	Early Registration (Until July 31, 2008)	On-site (After July 31, 2008)
Local Participant	RM750	RM850
Local Student*	RM500	RM550
Foreign Participant	US\$400	US\$500

- Registration includes conference attendance and all catering (morning teas, lunches, afternoon teas, conference dinner) and conference materials (Book of Abstracts and CD proceeding of full papers).
- Authors intending to present more than one paper will be subjected to surcharge of RM250.00 / US\$80.00.
- Full paper will only be included in the proceedings once payment is received by the secretariat.
- Student ID is required for the Local Student rate. Student registration fee do not cover Conference Dinner.

## EXHIBITION

A concurrent exhibition will be organized as part of the International Conference on Environment 2008. Various agencies and information providers related to areas of environment, as well as commercial suppliers of chemicals, scientific equipment and academic publications will be cordially invited to exhibit and promote their products to the delegates and visitors at the conference. Thus, the exhibition is expected to provide the perfect complement to the conference sessions.

## KEYNOTE LECTURE

Prof. **Adisa Azapagic**

- Professor of Sustainable Chemical Engineering & Deputy Head of School and Head of Research
- The University of Manchester, UK
- Carbon Footprinting of Industrial Supply Chains

## PLENARY LECTURES

Prof. **Frank Behrendt**

- Chair for Energy Process Engineering and Conversion Technologies for Renewable Energies
- Berlin Institute of Technology, Germany
- Technological, Ecological and Economical Aspects of Biofuel Strategies

Prof. **Yukihiko Matsumura**

- Manager of Biomass Research Centre
- Hiroshima University, Japan
- Hydrothermal Treatment of Biomass for Sustainable Development

Prof. **Zhiguo Yuan**

- Professor in Environmental Engineering and Deputy Director of the Advanced Water Management Centre
- The University of Queensland, Australia
- Fugitive Greenhouse Gas Emission from Waste Water System

Ir **Jeffrey Khor Chooi Beng**

- Senior Manager - HSE
- BASF PETRONAS Chemicals Sdn. Bhd., Malaysia

Y. Bhg. Dato' Hjh. **Rosnani Ibarahim**

- Director General
- Department of Environment, Malaysia
